Just a Quick and Easy Installation Away

Selection Guide

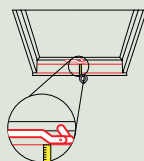

START HERE!

STEP 1 Measuring Your Windows

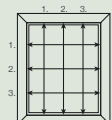

Tips for Success

- Use metal measuring tape, as cloth tapes may stretch.
- Order with the exact measurements.
- Fill out all fields on order form.
- DO NOT add or subtract.
- To ensure accuracy, always measure twice.
- Measure to the nearest 1/8".

Measure Window Depth
from any obstacle to the edge of the window frame.

Note
Obstacles may be locks, window handles, storm bars, and winders.

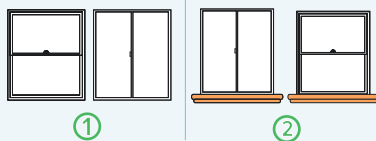

Measure Window Opening
Measure inside width and height in 3 places. Use the smallest measurement when placing your order.

STEP 2 Determine Your Window Style

Windows that slide open and either:

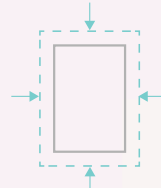

- ① With no trim and sill
- ② Or with sill only

STEP 3 Checking Clearance and Squareness

Wall Clearance

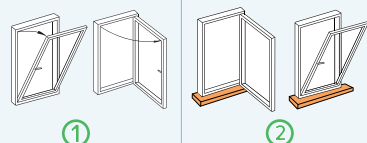

Check for obstacles. Measure the wall space around the window as shown in the illustration. Then check the minimum wall clearance for Deco Frame or L Frame in Step 4.

STEP 4 Choose A Frame Style

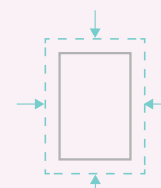

Windows that tilts open and either:

- ① With no trim and sill
- ② Or with sill only

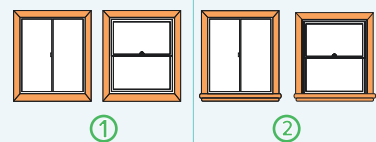

Wall Clearance

Check for obstacles. Measure the wall space around the window as shown in the illustration. Then check the minimum wall clearance for Deco Frame or L Frame in Step 4.

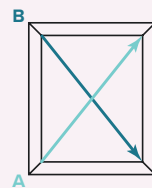

Windows that slide open and either:

- ① With trim only
- ② Or with trim and sill

Window Squareness

Measure the distance of Line A. Measure the distance of Line B. If the difference is more than 1/2", the Hang Strip frame cannot be used. Choose Deco Frame or L Frame.

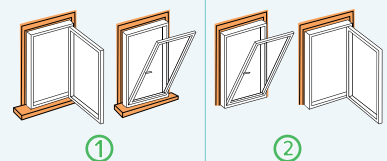

Hang Strip

Hang strips are mounted inside the casing to blend in with your walls and shutters.

Windows that tilts open and either:

- ① With both trim and sill
- ② With trim only

Shutters are not recommended for this type of window.
